

## ECC Monthly Safety Tip

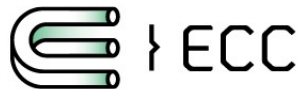

February 2026

Love your Assets –  
They will love you back

Team Members:

**Cameron Palmer, Chemical Project Designer, IMEG**  
**Savannah Snell, Digital Innovation Manager, IMS-DTS**

## In the owner/operator world, we are in a long-term relationship with our assets 🍷

---

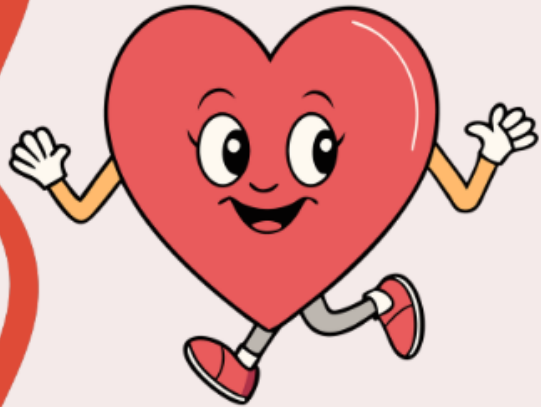

- Preventive maintenance prevents surprise failures and unplanned downtime
- Small issues grow when ignored — leaks, corrosion, vibration, alarms.
- Consistent inspections protect people, production, and the environment.
- Strong documentation ensures continuity across shifts and teams.

# NEGLECT LEADS TO HEARTBREAK

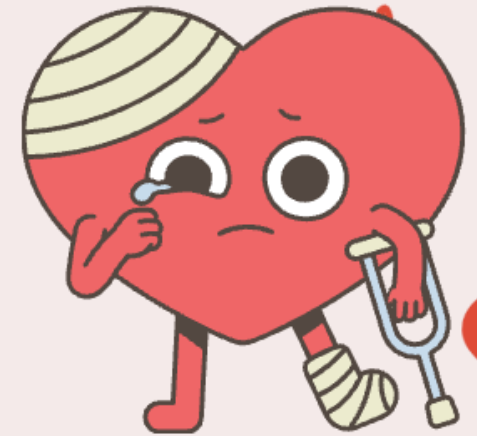

## HOW WE SHOW OUR ASSETS LOVE

- Complete inspections on schedule
  - Report abnormalities early
  - Eliminate temporary fixes
- Follow procedures and MOC processes
- Keep accurate records

## WARNING SIGNS AN ASSET NEEDS MORE LOVE

- Leaks, vibration, temperature changes
- Backlogged maintenance or overdue inspections
- Operating outside recommended limits
- Missing documentation

PREVENTATIVE MAINTENANCE IS CHEAPER THAN HEARTBREAK MAINTENANCE
